

# Stream (Classic) Migration - Video Report Dashboard

You are using the latest version of inventory report and PowerBI template.

**Description:** This Power BI template is meant to provide helpful visualizations **on top of Stream (classic) inventory report.** [Refer to public documentation.](#)

## Report Pages

- **Overview:** The current page. Provides an overview of the report.
- **Summary:** This page contains summary information meant to give an overview of the current state of your Stream Classic environment based on the video report .csv generated by the migration tool.
- **Container Summary:** This page contains summary information regarding counts of videos based on selected filters. It can be used to generate a .csv export of containers that meet specific criteria for the Migration Manager tool [here](#).
- **User Summary:** This page contains summary information that can be filtered down to specific individuals, which may be helpful in migration discussions if one individual owns or creates videos across multiple channels. It can assist with narrowing down which specific containers may be of interest.
- **Container Details:** **Requires selecting a container in the slicer.** This page contains summary information on a specific container. It will provide insights at the video level regarding migration eligibility and status.
- **Data Dictionary:** This page contains additional descriptions for columns found within the dataset.
- **Video details:** This page gives an inventory list of all videos and their metadata in Stream (classic). It can be used to search an individual video, its metadata or find its migrated destination.

# Export Container List for Migration Manager

**Instructions:** Hover over the table below and click the ellipses [...] that appear in the top right corner of the table visual and click "Export Data" to export the csv file filtered down to your selection.

*Note:* Power BI is limited to 30,000 rows for a .csv export, so you will have to ensure your selection meets that requirement.

**Migration Manager Documentation:** [Bulk upload Stream source paths into Migration Manager - Migrate to Microsoft 365 | Microsoft Learn](#)

# User View

**Note:** Currently, the "Link" column containing the hyperlink to the video will be empty for "User" container types, but available for M365Group and "CompanywideChannel" container types. This is due to data availability in the .csv files imported into this template.

# Data Dictionary

Column Name ▲	Description
Container (ID, Name, Type, Email)	These values can be empty if the video is an orphan video and does not belong to any container. See here for details on Orphan Container
Last View Date	This date has been captured since June 30 2021. Any video uploaded and viewed prior to that would have this field as empty
MigrationEigibleReason	Text description detailing why a video is eligible or ineligible.
MigrationEligible	For a video to be eligible for migration, it will have to satisfy the criteria below. Only such videos will be discovered via the Migration Tool: <ul style="list-style-type: none"><li>- State either Processing or Completed</li><li>- Published</li><li>- Non-empty container id</li></ul>
StaleContent	If the video has not been viewed since June 30 2021, it is considered "Stale Content". If it has been viewed (LastViewDate is not null), then it is considered "Current Content"
State	Created = Record created but upload hasn't started Uploading = Video is being uploaded Processing = Upload successful but currently being processed Completed = Processing was completed Deleted = Soft Deleted (will be available in recycle bin) Error = Error during upload or processing Live = Live broadcast is in progress
Video Count	The migration tool has a priority logic of assigning videos to a container. It is the count of videos associated with the container as per inventory report or the migration tool.
VideosInStreamClassic	Count of videos visible in Stream (Classic).
VideosViewed_Last30Days	Count of videos viewed in the last 30 days (based on LastViewDate), relative to today's, current date.
VideosViewed_Last60Days	Count of videos viewed in the last 60 days (based on LastViewDate), relative to today's, current date.
VideosViewed_Last90Days	Count of videos viewed in the last 90 days (based on LastViewDate), relative to today's, current date.
